Yet more individuality and freedom of expression: JADO fittings are available in a variety of surface finishes. Here are some examples.

## Name syntax

All JADO products come with a seven digit product ID. The initial letter in combination with the four following digits constitute the article number while the final two letters define the surface finish.

Prod.ID	Finish	
H2369	AA	Chrome
H2369	GN	Ultra Steel
H2369	A9	Ultra Brass
H2369	F2	Chrome / Ultra Brass

JADO offers the **ULTRA | FINISH** exclusive conditioning procedure, making surfaces more scratch resistant, more colour fast, ultra hardwearing and more resistant to corrosion. The molecular fusion of metal and gas ions creates an extremely hard surface, providing an extra-long service life. The following surfaces feature this conditioning: Gold (23 carat) (A4), Ultra Brass (A9), Ultra Steel (GN) and Diamond Finish (XO).

AA Chrome

A4 Gold

Furthermore, almost all JADO fittings are available in the surfaces Aranja (AF) and Old Bronze (XM).

On request, each JADO fitting can be supplied with almost all available surfaces. Please contact us for details.

Note: For technical reasons associated with printing, there may be slight variations in colour from the original.
